

About Philips

Philips Ventures invests in and accelerates healthcare start-ups across the world. We look for companies demonstrating novel approaches to addressing health delivery models and clinical needs and leverage the Philips global network to help these solutions scale.

Challenges

Challenge 1

*We are looking for start-ups that offer healthcare-specific cybersecurity and compliance capabilities and solutions for our customers who are providers and health systems.
and allow us to protect, secure and comply with rapidly changing healthcare technology adoption in hardware, on premise software, and cloud as well as shifting policies in areas as privacy.*

Challenge 2

*We are looking for startups that offer healthcare-specific AI-enabled propositions
and allows us to enable higher Radiologists-Pathologists collaboration*

Challenge 3

We are looking for start-ups that offer healthcare-specific AI-enabled propositions.

and allow us to reduce operational costs, improve quality and/or increase output via standardized digitally enabled workflows or clinical services. For example by:

- Automatically creating perfect orders from referrals;
- Identifying unwarranted variations in care and workflows to recommend optimization and standardization;
- Enabling faster, shared decision making among caregivers across departments and by automation of report generation & results communication

Challenge 4

We are looking for startups that offer healthcare-specific AI-enabled propositions

and allows us to replace contrast enhanced imaging by non-contrast imaging using novel technologies
